CHINOOK, ALBERTA, FEB. 24, 1916

Subscription: \$1.00 per year, in advance. Single Copy, 5 cents

Car Situation Improving!

Breezelets

"Over one thousand Anglican curates want to enlist," reads a news item.

Quite a "surplice" supply of fighting parsons.

Clean-up week comes early in May, and both belligerents probably are confidently hoping that they will be able to observe it.

Everybody is talking about Sea Power these days.

Certainly, it's much more likely to end the war than Wait-and-See Power.

C.O.'s and N.C.O.'s.

The above initials now stand for Conscientious Objectors and Non-Conscientious Objectors.

The old question of "Are you a Mason?" is out of date.

What the shirkers are asking each other now is "Are you a Quaker?"

Amongst war inventions is a collapsible bed for soldiers to be carried across the shoulders.

A new (k)nap sack, in fact.

Mr. Ford went to Chicago, but he shunned reporters. The 57 varieties of reporters he took with him to Europe have settled the reporter problem with him for all time.

Slacker with the troubled brow, Here's a chance for you. Join now! See Capt. Rideout, and he'll tell you how.

It is reported that at one of the Canadian hospitals in England operations are being performed to music.

Come to think of it, it is only natural that music should be associated with "opera"-tions.

So Harry Thaw is in the real estate business.

For land's sake! What next?

The "Trench Gazette," speaking of President Wilson, says: "He'll go down to history as Wouldn't-Row Wilson."

Chinook School Board

ASKING DEPT. FOR A THIRD TEACHER

Minutes of meeting held on Tuesday, Feb. 15th. Letters of Western School Supply account read.

Mills—Deman, Sec. write explaining how and when we will pay it.

Deman—Mills, that agreement of Townsite re school site be placed on file.

Deman—Mills, that Phone Bill of \$1.15 be paid.

Deman—Mills, that this district agree to pay half of janitors fee \$8.00 for hall till termination of the lease.

Mills—Deman, Sec. write Dept. for teacher holding 2nd class certificate for the school, also send to Dept. copy of agreements re Carpathia, Popular, Buffalo, Plains and Crocus school districts.

Deman, that Mills see to the arrangements about supply for school.

Chinook Woman's Institute

WILL DO RED CROSS WORK

At a special meeting of the Woman's Institute on Feb. 19th it was decided to begin at once on Red Cross work. In order to raise funds to successfully carry on this work, arrangements were made for a social to take place on March 8th. Games, music and contests will be the order of the evening and a good time assured. The next regular meeting of the Institute will take place at the home of Mrs. Deman on March 4th. All women who are interested in Red Cross work are cordially invited to attend.

Dr. H. Mecklenburg of Edmonton, the Graduate Optician and exclusive Eye Sight Specialist, will pay us a professional visit, he will be at the Chinook Hotel on Thursday, March 9th. See him about your eyes. Charges moderate. Satisfaction guaranteed.

CHURCH SERVICE

Sunday services in the Church every Sunday evening, at 7.00. Sunday School at 11 a.m. Rev. C. Easom, minister in charge. R. C. CHURCH: Rev. Fr. W. R. Dargen will say mass the first Friday in each month in I.O.O.F. hall, at 9 o'clock a.m.

ASSIMILATION

OF OUR FOREIGN POPULATION

THE practical cessation of immigration to this country because of the present great European war is having a two-fold effect.

It is causing a scarcity of labor and it is also giving this country a chance to catch up in the process of assimilation of the immigrants already here.

The scarcity of labor, caused by so many of our young men enlisting for overseas service, together with the almost entire stoppage of emigration to fill up the gaps, will mean a very serious problem to the farmer and the employer of labor, and will have a tendency for those who demand an increase of wages to secure them, particularly if this country should get a similar crop to that of 1915 and the period of prosperity keeps up.

With a continued activity the work of assimilation the immigrants should go forward much faster than has any hope that it would a few years ago among certain of our foreign population, other than alien enemies in the present war.

The effect for good upon the whole country of a better assimilation of the new comers, the effect for good of a solidification of Canadian sentiment all through the dominion cannot be over estimated.

Some of the statesmen of the older civilizations have always looked to a foreign war as the surest method of solidifying their nations, of getting rid of discontent.

But a far better method of solidifying a nation is that going on in this country where those of other nationalities may be brought side by side in the race for a competence and get a fair chance to attain it.

COULDN'T FOOL HIM

Inspector (to teacher) Do you teach observation?

Teacher: Yes.

Inspector: Then I will test the class. Now, children, shut your eyes and sit still. Following this the inspector made a slow whistling sort of a noise, and followed with, now, children, what did I do?

For some time there was no answer, but ultimately one little boy piped out, "Kissed teacher."

Chinook Breezes

Mr. and Mrs. Rideout left for Calgary this morning.

W. Riner's next shipment of hogs or cattle will be Wednesday March 1st.

A laughable sketch for next Tuesday night's concert. Don't miss it.

J. R. Miller wants a few sacks of potatoes. If you have some to sell, see him.

The attendance at church last Sunday evening was one of the largest for several months.

Rain in this part of Alberta on the 23rd of February is rather an usual occurrence.

J. A. McCull, M.P.P., is at Edmonton, attending parliament, now in session at that city.

The Empire Lumber Co., are adding an 18x32 feet addition to their warehouse and shed.

There are rumors of new businesses opening up in town in the future.

Enquiries have been made regarding ownership and prices of building lots in the business section of the town.

School Inspector Buchanan has been in this section during the past week. He was in town on Tuesday of this week.

Now a Village Councillor

At the nomination on Monday W. Milligan was elected by acclamation to fill the vacancy in the Village Council caused by the resignation of Councillor Rideout.

Mass Will Be Said

A R. C. service will be held at the home of Mr. I. W. Deman on Tuesday, Feb. 29th, at 10.45 a.m., when mass will be said by the Rev. Father Bowen.

Home, Sweet Home Again

Secretary Lorne Proudfoot of the R. M. of Coliholme and Secretary R. Carke Fraser of the K. M. of Sounding Creek have returned home from Edmonton, where they were attending the annual convention of the R. M.'s, held in that city last week.

Building a 60,000 Bushel Bin

A 60,000 bushel bin is being built at the rear of the Chinook Farmers' Elevator. The building is 40 by 100, 16 feet high from floor to plate. This is built by fifty farmers on the co-operative plan, each of whom have the preference to the use of the bin. The contract was let by the Farmers' Elevator Co. This will be a great boon to the farmers.

Presented With a Purse of Money

Farewell to Capt. and Mrs. C. W. Rideout

On Wednesday evening some of the friends—and the congregation—of Capt. and Mrs. C. W. Rideout met at the church on Wednesday, after choir practice, and enjoyed a social hour or two together, prior to their departure from Chinook—Mr. Rideout to Medicine Hat and Mrs. Rideout to Calgary. During the evening, on behalf of a number of business men and friends Mr. and Mrs. Rideout were presented with a purse of money, as a slight token of the appreciation in which they are held by their fellow townsmen in Chinook.

A few words of regret were expressed by the Rev. C. Easom, Messrs Isbister, Neff and W. Bel-den.

After which the following address was read Mrs. Isbister and the presentation made by Mrs. J. R. Miller:

Chinook, Alberta,
Feb. 23rd, 1916

To Mr. and Mrs. C. W. Rideout: Dear Friends,—It is with feelings of sincere regret that we say good-bye to you on this occasion.

During your stay in Chinook we have learned to hold you in esteem as fellow citizens, and your life and work in this capacity have been truly appreciated by those who wish you well.

As members of the church and congregation we have found you deeply interested and helpful in various departments of church work, and we realize it will be hard to fill your places.

In your departure, we feel that you have followed the promptings of your heart in responding to the call of the Empire.

In saying good-bye we would commend you to the care and protection of the Heavenly Father whom you have tried to serve faithfully.

We say farewell with the heartfelt prayer that not only in your training, but also in the battle front you will find Him your close Companion and feel you are safe in His care. May God grant you safe return to home and friendships.

As a small token of the esteem in which we hold you, we ask you to receive this present.

Good by and God bless you both.

Chinook Breezes

Chinook was fortunate in getting eight cars this morning—the most for some months.

Wheat took a tumble downwards this morning of five cents. Bound to go upwards again in near future.

Chinook gets another hardware store. The late Deering warehouse, one door north of the telephone central, is being fitted up as an up-to-date store. Just twenty-four hours after the deal had been put through, a gentleman came in from Winnipeg to make arrangements to open up a hardware store in town, but was, of course, too late.

Something New

COME AND SEE WHAT IT IS

A book social is to be given in the Chinook church on Tuesday evening, February 29th. This will be the last chance for four years to enjoy a social time together on the 29th of February, so don't miss this opportunity. A good time is promised.

Signed on behalf of the congregation of the Chinook Methodist Church.

C. Easom (pastor)
W. W. Isbister (for Board of Trustees)
Mrs. J. R. Miller (for the Choir)

Capt. Rideout thanked them for their kindness and the sentiments expressed in the address, and he hoped sometime later to return to Chinook and become one of their fellow citizens again. Mrs. Rideout would be returning when he left for England.

Light refreshments were served by a few of the ladies of the church. Mr. and Mrs. Rideout will be greatly missed in Chinook, where they have both taken a keen interest in social, and also Church work, members of the choir and Mr. Rideout being financial secretary of the church as well. Their places will be very hard indeed to fill. We expect some time to welcome them back again to Chinook among our residents—when the war is ended.

The meeting closed by all joining hands and singing "Auld Lang Syne."

SYNOPSIS OF CANADIAN NORTH- WEST LAND REGULATIONS

THE sole head of a family, or any male over 18
years old, may homestead a quarter section
of available Dominion land in Manitoba,
Saskatchewan or Alberta. Applicant must appear
in person at the Dominion Lands Agency or
Sub-Agency for the District. Entry by proxy may
be made at any Dominion Land Agency (but not
Sub-Agency), on certain conditions.

Duties—Six months' residence upon and cultivation
of the land in each of three years. A homesteader
may live within nine miles of his homestead
on a farm of at least 80 acres, on certain conditions.
A habitable house is required, except where residence
is performed in the vicinity.

In certain districts a homesteader in good standing
may pre-empt a quarter-section alongside his homestead.
Price \$100 per acre.

Duties—Six months' residence in each of six years
after earning homestead patent; also 50 acres extra
cultivation. Pre-emption patent may be obtained as
soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead
right may take a purchased homestead in certain
districts. Price \$2.00 per acre. Duties—Must reside
six months in each of three years, cultivate 50 acres
and erect a house worth \$200.00.

The area of cultivation is subject to reduction in
case of rough, scrubby or stony land. Live stock
may be substituted for cultivation under certain conditions.

Successful Ball

A PRETTY SCENE

The ball, given under the
auspices of the Rebekah and
Chinook I. O. O. F. Lodges on
Tuesday evening, Feb. 22nd, was
the most enjoyable and social
affair ever given in Chinook;
seventy-five couples attending.
The dainty programmes, printed
at the Advance Office, in pink
and green—the color emblem of
the Rebekahs, with pencils and
silk cord to match, were much in
evidence and freely made use of,
the engagements being filled for
each dance of the twenty-two selections. It was a pretty sight to
see the daintily gowned ladies

fitting hither and thither to the
rhythm of the orchestral music.
There were quite a number of
out-of-town people present who
thoroughly enjoyed the evening.
The hall was very tastefully decorated
with the colors of both
Orders. The ball being such a
great success, another one is
spoken of in the spring.
The Rebekah ladies furnished a
very dainty lunch.

SHALL MILLIONS BE SPENT TO CARRY OUT PREPAREDNESS

Photos by American Press Association.

1.—Fourteen inch guns of battleship New York. 2.—Secretary Daniels. 3.—Secretary Garrison. 4.—Submarine of the K type. 5.—S. Stanwood Menkin, president of National Defense league. 6.—Group of business men in camp at Plattsburg, N. Y. Third from left, Robert Bacon, Jr.; fourth from left, Mayor Mitchell of New York.

ALL the nation is now talking preparedness. The papers are full of stories about the condition of our army, navy, coast defenses, aeroplanes, equipment, ammunition, etc. The halls of congress are ringing with speeches for and against big appropriations for the army and navy. The fight is on, and the end is not yet in sight.

One of the most interesting features of the discussion now heard everywhere is the plan to improve the defenses of the New Jersey coast. Since nothing relative to the supposed new defensive measures has been announced and since the individuals whose surveys and examinations have been presumed for the war department have not talked about their work, the whole matter is still within the realm of speculation. Some features of the supposed plan, however, have seemed to be quite plain to persons familiar with the work going on at Barnegat Bay, Sea Olet, Port Republic and other points of value.

As the matter stands the guess is that the government is getting ready to establish a submarine base in Barnegat Bay, to provide an aviation base near Lakehurst, to fortify Sea Olet with big guns and to equip similarly at least one other coast position between Barnegat Bay and Cape May, and to

construct such a system of military highways as would connect Barnegat with Cedar Creek and Lakehurst with Atlaton, and to improve other roads in a way that would make them available for military uses. If the many persons along the coast who have followed developments are correct in their assumptions, the beginning has been made in a military and naval defense plan of importance.

It is said that the war and navy departments have had under consideration for a long time the necessity of establishing bases for subma-

rines and aerial craft at such points as would permit of a rapid defense of both New York and Philadelphia. The government is reported also to have an especial interest in the extensive clearing and building operations near Lakehurst, where hundreds of men are at work on munitions plans for a large munitions corporation, and the Du Pont interests have been busy.

Inspecting the Roads. In time with all of this is the fact that Colonel Edwin Stevens of the New Jersey state roads commission

has announced the result of a conference in Washington with Major General Leonard Wood and Chief of Staff Hugh L. Scott and officers of the engineering corps as to pressing needs in the way of military roads and substantial highways from Lakehurst to Atlaton and from Barnegat to Cedar Bridge. Such roads would connect Lakehurst with the main state road between Philadelphia and the southern coast and would connect Barnegat with excellent roads leading to both New York and Philadelphia. A Lakehurst-Atlaton road would parallel the

New Jersey Southern railway and also the coast line.

The United States system of coast defenses is "the most formidable in the world," but is short 530 officers and 10,433 men of the regular establishment and 271 officers and 8,821 men of the national guard to man all forts and mine defenses, according to war department bureau reports. Congress has appropriated \$175,000,000 to establish the present system, but at present batteries which cost \$41,000,000 are without trained personnel to man them.

These reports also contain the following facts and recommendations:

Batteries of sixteen inch fifty-caliber guns are recommended as the primary armament of all major forts in order that enemy ships may be kept at great distance. Mobile howitzer batteries of sixteen inch, seventeen inch or even larger guns are urged to supplement the permanent forts, the howitzers to be fired from railroad cars or motor trucks.

The coast artillery established scores of 35 per cent hits with twelve inch guns at 5,000 yard ranges as against 25 per cent and 45 per cent, respectively, in 1912. At 10,000 yards the scores were 35 per cent with the tens and 19 per cent with the twelves as against 15 and 14 per cent in 1912.

The army death rate was 4.40 compared with 5.15 the year before. There were only seven cases of typhoid fever out of a total mean strength of personnel of 25,619. A new low record was set for tuberculosis at 3.59 for all troops.

The full strength of the army on June 30 last was 105,932 officers and men, 68,253 of whom were in the United States, 14,740 of this number being on duty on or near the Mexican border. Vacancies in the enlisted force were reduced from 8,572 in 1914 to 1,756, the year having seen 45,813 recruited, of whom nearly 90 per cent were born in the United States.

On Oct. 1 the full strength of the organized militia was 8,766 officers and 120,693 men, just 221,571 below the required enlisted strength of the organizations. Inspecting officers estimate it would require from two to twelve months to put the militia in the field in the federal service.

There were 32,313 students enrolled in ninety-six schools having military courses, and graduates from these schools since 1905 number 35,430.

Greatest Battleships Nearly Ready.

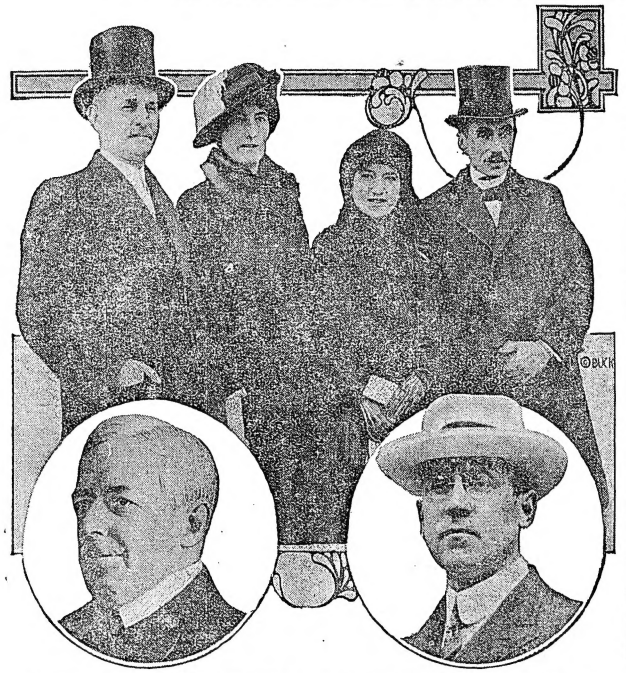

A complete new division of dreadnaughts, consisting of four of the largest and most powerful battleships in the world, costing about \$40,000,000, will be added to the United States navy within the next twelve months. These new vessels, the Nevada, Oklahoma, Pennsylvania and Arizona, now nearing completion and totaling a gross tonnage of more than 110,000, represent the last word in American naval construction up to the present time, although plans drawn for five other dreadnaughts already authorized call for even greater measurements and fighting power. These vessels will have a combined defensive and offensive strength greater than the entire American navy at the time of the civil war. Mounting heavy fourteen inch guns, ten or twelve to a ship, each with a range of about fifteen miles and carrying large secondary batteries of smaller guns, with four torpedo tubes, the new vessels are expected to take the place of the present first division as soon as all four are in commission. The Nevada and Oklahoma were ready for service.

A Japanese Custom.

WHY not polish your floors as the Japanese do? The polish is made of one pint of linseed oil to which is added one pepper cone, two ounces of spirits of salts and the whites of two eggs. After it is thoroughly mixed it should be bottled.

Before using shake it well. Then take a piece of old silk and with it apply the polish to the floor. After it is well rubbed in, polish it with another piece of silk.

Many Good and Lasting Results Expected To Accrue From Pan-American Conference

DELEGATION TO PAN-AMERICAN CONGRESS FROM SALVADOR—LOWER RIGHT, JOHN BARRETT, SECRETARY OF THE CONFERENCE; LEFT, SECRETARY OF STATE LANSING.

AT practically every session of the many groups into which the pan-American scientific congress was divided broad general suggestions of means for binding all the Americas in such a pan-American

ism as Secretary Lansing characterized in his address of welcome as "one for all, all for one," was considered. The pan-American delegates discussed the probably deeper significance of their gathering when they heard of the attention attracted among the European diplomats by Secretary Lansing's declaration that "if the sovereignty of a sister republic is menaced from overseas the power of

the United States and, I hope, the united power of the American republics will constitute a bulwark which will protect the independence and integrity of their neighbor from unjust invasion or aggression."

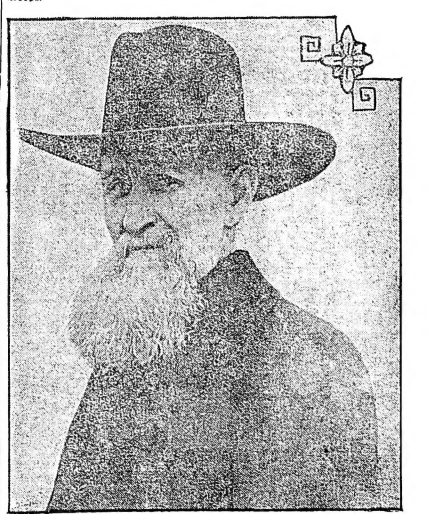

None of the delegates attended the congress with any planetary powers, and it is realized that the most important result of the gathering will be the impression they carry back to their homelands.

The extent to which the Latin Americans have been taken into the inner circles of official and private society in the capital probably never has been equaled in any other official gathering. It has been so marked that in a formal statement, Director General John Barrett of the Pan-American union declared the spirit of fraternity and unity was the dominant note of the gathering.

"Both victor and vanquished in the European war will be hostile to America at the close of hostilities," declared John Barrett, secretary general of the second pan-American scientific congress and director general of the Pan-American union. In the course of his address he put into definite expression the general belief of those who are in close touch with the congress that as a result of this gathering of the Americas any trespass upon the rights of one of the republics of the American continent must be ready to deal with the others. His address was regarded as a cord struck upon the basis of Secretary Lansing's keynote speech at the opening of the congress.

"The former," continued Mr. Barrett, "will say it won in spite of the attitude of the United States and the other American republics, and the latter will say it lost because of the attitude of the United States and its sister republics."

"In the minds and thoughts of everybody interested in pan-Americanism is the question, 'What is going to happen to pan-America when this war is over?' said Mr. Barrett. 'Immediately there is the reply, 'The American republics must stand together for the eventualities that may possibly develop.' The European nations will then have little love for us. 'No matter, therefore, how just and fair the nations of America may have been in their efforts to preserve their neutrality and in no way interfere on either side of this conflict, the war passions and the war power of the peoples and the governments of the victorious group of nations may force a policy toward pan-Americanism, toward the Monroe doctrine and toward their relationship with individual countries of the western hemisphere which will demand absolute solidarity of action on the part of the American republics to preserve their very integrity.'"

"CYCLONE" DAVIS, SIX FEET FOUR, OF TEXAS.

The Mystery of the Ravenspurs

By Fred M. White

Lond, Luck & Co. Limited
London, Ontario and Toronto

(Continued)

CHAPTER LV.

A Shock for the Princess

It was not a pleasant task, but it had to be done. Fortunately it was possible to do everything discreetly and in order, for the ravens were tame and the ravens were tame and the ravens were tame.

"Inform the head of the house and send for the police," Tegorsky said, as far as I can see, it was the only way to keep the matter a secret. Nor was it to blame. Those men here for no good purpose, and we took steps to prevent them from entering the house.

"Unfortunately, we forgot there would be an exceptionally high tide, and consequently they have paid the penalty of this neglect. I have only to say these two fellows as we did the others.

"Then let the police find it," Tegorsky said promptly. "It will be the link in the evidence that we require. When you come to tell our story, Ralph, as the police find that letter, the net around Princess Zara will be complete. I have only to produce that diary and the case is finished.

Ralph nodded approval. Five minutes later and the head of the house seated over a book in the library, was exceedingly astonished to see Ralph and Tegorsky, followed by Tegorsky, enter the room.

"He went a keen observer of life," Tegorsky said, as he sat at the head of the table, "he saw at once that there was a grave import for him.

"I do not understand," he said, "Dr. Tegorsky, I am anxious to know the impression that you have formed on the subject of this case."

"Other people shared the same opinion, sir," Tegorsky said coolly. "The great importance of another man was my first impression. It was necessary for certain people to regard me as dead, your enemies particularly. But perhaps I had better explain."

"It would be as well," Ravenspur murmured.

Tegorsky proceeded to clear the mystery of Zara's death. He had told the whole story, beginning at Lassa and going on to the end. Ravenspur listened with the air of a man who dreams. The story of his life to the quiet of an English shore seemed impossible to believe that such things could happen. And why should these people persecute him? Why should they come here? What did these men mean by drowning themselves in the vaults?

"They came here at the instigation of Mrs. May," Tegorsky said.

"But I don't see that it had anything to do with it at all."

"You will find in a minute," said Tegorsky, "that I am right when I tell you that Mrs. May and Princess Zara are one and the same person."

Ravenspur gasped. He had never heard of a woman under that name. He had never heard of a woman under that name. He had never heard of a woman under that name.

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"That was the woman who had killed him with her own hands. Even yet he could not understand the mystery."

"She knows already," Tegorsky said. "That woman has great influence over her child. And the idea was for the child to get everything, the others were to be killed. It was the only one left. With this large fortune at command, Zara meant to be another Queen of Sheba. And she would have succeeded, too."

Ravenspur shuddered. It was torn by conflicting emotions. Pious tenderness and sympathy for Marion Tegorsky's noble approach. How could she know? How much had she suffered? Was she entirely in the dark as to her mother's machinations, or was she resolved to protect the relatives near?

Ravenspur poured out these questions one after another. Tegorsky's reply would say nothing to relieve the other's feelings on these points. "What you ask has nothing to do with the case," he said. "I have provided to you, I am prepared to prove in any court of law, how your family has been destroyed and who is the author of the mischief."

"She is under your roof, where she is powerless to move. Her two confidants, the dead in the vaults, I have already explained to you how it came about that the princess was here, and for information, I have only to say these two fellows as we did the others."

"Then let the police find it," Tegorsky said promptly. "It will be the link in the evidence that we require. When you come to tell our story, Ralph, as the police find that letter, the net around Princess Zara will be complete. I have only to produce that diary and the case is finished."

"Then let the police find it," Tegorsky said promptly. "It will be the link in the evidence that we require. When you come to tell our story, Ralph, as the police find that letter, the net around Princess Zara will be complete. I have only to produce that diary and the case is finished."

Farm Lands in B.C.

Valleys of Central British Columbia Offer Exceptional Inducements to the Agriculturist

The Grand Trunk Pacific Railway is concentrating its colonization efforts on settling the splendid and fertile lands of central British Columbia, which present all the attractions for an experienced farmer wishing to engage in the most profitable form of agriculture—mixed farming.

The above prospect represents a small exhibit of really magnificent grains and grasses, both as far as fertility and soil are concerned, with the best of the world's crops, wheat, oats, barley, speltz, peas, vetches, several kinds of wild and tame berries, wild pears, beans, corn and buckwheat.

The valleys of Central British Columbia are quite numerous and represent undoubtedly the most attractive part of the Canadian West for anyone seeking a new home in splendid conditions, surrounded by beautiful nature, where productive land and a good climate for farming operations are insured.

Among the many and various classes of farmers residing in the

Canadian West, there are a large number of thoroughly pastured people who emigrated to this country some forty years ago. They are known under the name of Menomies, although originally they are Hollanders, where they migrated to Germany and then to Russia, coming to Canada directly from the latter country, and they prove to be a real national asset to this country on account of their industry, thrift, and tenacity to agriculture as a pursuit. Every few years, when the youth grows into manhood, a movement of Menomies is experienced, which takes the form of a search for suitable locations to establish a new colony where the rising generations of Menomies can follow the same path.

During the past few months, the Menomies of Saskatchewan and Manitoba have been investigating various districts on both sides of the international line, finally deciding to settle in the Salmon River valley, which is located five miles north of the growing division point on the main line of the Grand Trunk Pacific Railway, Prince George.

There is no doubt that this initial movement will develop within a short time into a large colonization of the fertile lands of central British Columbia, on which both the Grand Trunk Pacific and the British Columbia government are offering every inducement possible.

British Flee Has Won

The Complete Victory Attained by Britain on the Seas

Nations, like men, achieve the ends they work hardest and longest for. The German army is the most effective equipped host the world has seen. Armed and disciplined as her hosts and forces of historic times from Xerxes to Napoleon could make head against them. In this manner the combined war fleets of Germany and all the little craft that have sailed the seas from Salamis to Trafalgar or to Manila would be impotent against the British navy.

The German armies have won and lost in Poland, in Russia, in Belgium and something like a twenty-fifth of the soil of France. But the British navy has won and lost the sea, and on all the illimitable ocean no ship can sail on any mission of peace or war without the permission of her. That is the net result to date. If England is not conquered or bought off, who are now living will never see the German flag again in any port except her own, on any sea of the globe.—Rochester Post-Express.

Concentrated Economy

The beef of a whole bullock is required to make a dozen bottles of Bovril. You can safely reduce butchers' bills if you use Bovril in soups and stews. But it must be Bovril, in the Bovril bottle. No substitute will do. The strength and nourishment of Bovril cannot be compressed into cheap cubes.

Good Looking Harness

Stays good looking—and old harness looks like new when you give it regular applications of EUREKA HARNESS OIL.

Prevents cracking. Puts life into the harness. Makes it strong, pliable, last longer. One application will convince you.

PERFECT RAZOR PASTE
Will remove your razor and cut your skin in any way. Lather it on your face. It will remove your razor and cut your skin in any way. Lather it on your face. It will remove your razor and cut your skin in any way. Lather it on your face.

Milk Used For Hun Bombs
The Daily Mail has recently published a rebuttal of the German claim that their babies are without milk, citing a recent German census of milk cows, which shows, it says, that if the output were used for babies instead of conversion into nitroglycerine, there would be no lack now, and that the German babies are without milk.

Maxin Says Kaiser Must Go
Sir Maxin says the Kaiser must go. He says the Kaiser must go. He says the Kaiser must go. He says the Kaiser must go. He says the Kaiser must go. He says the Kaiser must go. He says the Kaiser must go. He says the Kaiser must go. He says the Kaiser must go.

Captured Two Standards
A young Russian soldier, the standard bearer of his regiment, fourteen years of age, was taken with his standard by the Germans. During the night his guard slept. The young Russian crept up to him, killed him, and took his standard. He then crept back to his own lines, and handed the standard to his own commander.

Too many women struggle under pains and aches. They are not sick—but weak, nervous, irritable.

Cholera in Volcanoes

Strange Superstitions Associated With This Dreaded Disease

Cholera has usually found a useful ally in superstition. In the olden days the disease was believed to be bottled up in volcanoes and to be released by eruptions. The most effective way to avoid it was to sleep in bed with your head due south. In Russia during the terrible epidemic six years ago, the peasants were actually accused of causing the disease, but drank a fearful mixture of tar, resin and petroleum as a cure. In the East, the cholera is believed to be caused by the "evil eye" and is cured by the use of amulets and charms.

A Callosity Bounder
On several occasions while in India the "Crown Prince of Germany's" hand was observed in Ireland in 1832. According to the contemporary "Dublin Journal" (1832), immediately the cholera came all the birds vanished from the rookery in the Marquess of Sligo's demesne, one of the largest in Ireland. "For three weeks, during which the disease raged violently, these noisy tenants of the trees completely deserted their lofty habitations. In the meantime the revenue police found immense numbers of them lying dead upon the shore near Eris, about ten miles distant."

More cruelly still was the remark he made to a Maharajah when he went to see him, and who with him in the howdah when a bear started to enter a dense clump of trees, in which the Maharajah's panther had taken refuge. A native officer shouted a warning to the Maharajah to get out of the howdah, whereupon the Prince turned to the Maharajah in impatient protest.

"Tell him to let the dogs go on your highness," he cried. "It's not every day that one can see a man like you, who is so kind as to let the dogs go on your highness."

"What became of that theological student you used to chum with?" "Gone to the hall."

"Yes; he's doing mission work in a tough neighborhood in New York."

There is nothing repulsive in Mill's or Worm powders, and they are as pleasant to take as sugar, so that few children refuse to take them. In some cases they cause vomiting through their action in an unusual stomach, but this is only in the hands of the unskillful. The German doctors, in their cleaning powder, no indication that they are harmful, no indication that they are harmful, no indication that they are harmful.

Importance of Archangel

Development of Port Has Been Remarkable During the Past Year

The trade and commerce department at Ottawa has received an interesting description of the development of the Russian port of Archangel, which is now the only Russian port in Europe which has direct sea communication with the outside world. The sea is kept open by icebreakers, two of which went from Canada to the assistance of the beleaguered Russians.

Archangel is now a city of 40,000 inhabitants and the construction of transportation facilities is being rushed. Two years ago it had only three piers, today it has 45. During the past year 100 huge warehouses have sprung up, not so great as the seaports of the world, but these are far from sufficient and ships have to lie for weeks in the stream before they can unload. The chief drawback is that if it had not been for this, Archangel, with its miles of waterfront, would have been one of the finest ports in the world.

But there is a great system of inland waterways connecting the port with all of the interior of Russia and it is possible to ship goods in summer from the port to nearly every town in the country. The barges and river boats carry up to 2,000 tons each. There is a tremendous concentration of cotton at Archangel.

At Kola, in Lapland, a port is being developed. A railway is being constructed, by next month and the value of that port is that the gulf stream has enough effect to keep open all the year round. With this railway in operation, the whole of Russia and Siberia will be linked together.

Worms in children, if they are not attended to, cause convulsions, and often death. Mother Graves' Worm Expeller will protect the child from these distressing afflictions.

Horsemanship
A Russian artillery horse won a bronze medal at Plevna. Orders were given for some ammunition wagons to be hauled to a spot that meant crossing the enemy's zone of fire. All the time shells were crashing down and the horses were being shot at by the enemy's artillery.

Without number did the Russian drivers, springing neither whip nor spur, attempt to urge the horses forward, but they stood covered and shivering with fright. Some were blinded; but the effect was that the Russian people desire the fire to develop into an actual alliance.

Therapeutic
The driver jumped down, and the horses, with a snort, began to explode, and after the war the horse was decorated in the manner described and the driver named.

MINARD'S LINIMENT CO., LTD.
The highest price ever paid in Canada for an Angus bull of his age was reached by the late Mr. J. H. McLeod, of Brandon, Manitoba, who has just been sold to a prominent stockman of the same city for five hundred dollars. He is the second highest priced animal from Brandon district recently.

The Fine Canadian Breed
The Canadians have a right to be proud of themselves. They have shown readiness to die for their country, and they have shown courage in fighting. Voltaire's "fine acres of snow" are a nation full of heroes.

There is something sorrowful in this ceremony. It is the remnant of a shattered nation, broken under foot, but undaunted and still maintaining its dignity.

Belgium's War Office
Dignity of Shattered Nation Still Shown in Ceremony Each Day at Havre

The Brooklyn Gazette, describing the Belgian scene of government at Havre, notes the following: "A 'stone villa' stood at the water's edge, where the Belgian flag flies through the day, although according to military custom, it is pulled down at sunset."

Three or our gentlemen, Baron de Breussche, the Minister of War, or two military chauffeurs, the staff of the war office stand at attention with their hands at the salute while a French mortar, with gray paint, is fired. The bugle sounds, the flag descends and is carefully folded and put away in a box. Now until the soldier with the flag has disappeared into the building does one of the bugles sound.

There is something sorrowful in this ceremony. It is the remnant of a shattered nation, broken under foot, but undaunted and still maintaining its dignity.

Russo-Japanese Alliance

Czar Sends Decorations For the Emperor and Empress

The Russian press emphasized the political importance of the visit to Japan of the Emperor and Empress, who is the bearer of decorations for the Emperor and Empress of Japan from Emperor Nicholas. The grand duke, it is said, is improving the opportunity to express Russia's friendship for Japan.

The Novo Vremya says the Russian government feels the deepest gratitude to Japan for the valuable assistance during the present war. This was shared fully by the Russian people, and will not be without effect, the newspaper says, on the future relations between the two nations.

The House Gazette says that new grounds for a Russo-Japanese rapprochement have been opened by the attitude of Japan and that the idea of an alliance has gained fresh support. The House Gazette says that the Russian people desire the fire to develop into an actual alliance.

THE AGONIES OF NEURALGIA

A Nerve Trouble, Always Due to Weak, Watery Blood

Only those who have been attacked with neuralgia can form the faintest idea of what its victims suffer. A tingling of the tender skin, a sharp pain in the face, a severe headache, then piercing paroxysms of pain that is neuralgia. The cause of the trouble is a disordered nervous system, due to weak, watery blood. The cure is Dr. Williams' Pink Pills, which make new, rich, red blood, and thus build up and strengthen the disordered nervous system. Mr. Louis Martin, Allandale, Ont., says: "I am writing to let you know the great benefit Dr. Williams' Pink Pills have been to me. I was in a terrible state of physical weakness. My nerves were all unstrung and I suffered tortures from neuralgia in the head and throughout the nervous system generally. I was almost unfit for work, and only managed to get through the greatest difficulties. I doctored for about five months and in this time took over forty dollars worth of medicine without any benefit. More, I was actually growing worse, and finally had to take to my bed. My nerves got so bad that I could not turn over in bed without help and the pain was something awful. As I am a farmer you can easily see that necessary work was being neglected,

Mr. Farmer!

Board of Trade

A meeting of the business men and others interested, in the hall, on Wednesday evening, to re-organize the Board of Trade. As this is a very important meeting and greatly affects the prosperity of the town, or otherwise, it is desired that there be a large and representative attendance.

Ades's Shoes.
Assistant Secretary of State Ades probably owns more shoes than any other man in Washington, excluding dealers. He keeps about a dozen pairs in his office at the state department and as many more at his home. Mr. Ades has not accumulated his shoes because of any fad, but merely for the comfort that he has learned can only be obtained by having constantly on hand a multiplicity of shoes. It appears that when he arrives at his office in the morning after a brisk walk from his home he immediately changes his shoes and that through the day he makes several other changes whenever his pedal extremities begin to feel uncomfortable. For the most part the shoes are all of the same general pattern.—Boston Transcript.

A Grotesque Dresser.
The Rev. Robert Stephens Hawkes, the Cornish poet and antiquary, who died in 1875, wore crimson gloves and wading boots up to the hip and was sometimes seen riding on a mule in a poncho, a blanket with holes cut in it for his head and arms. He was asked by a woman about this garment and replied that it was the robe of an "Armenian archimandrite." His ordinary clerical attire consisted of a brown cassock with red battons, girded with a cincture. This costume was criticised at a ruralist meeting, and he retorted hotly: "At all events, brethren, you will allow me to remark that I do not make myself look like a waiter out of place or an unemployed undertaker and that I do scrupulously abide by the injunction of the seventeenth canon of 1603."

Freezing Burns.
Cold water with ice in it is the thing to use when an accidental burn from acids or alkalis is encountered. Nitric acid gets split at times, or even vitriol may. A limb burned with acids must be plunged in cold water and kept there, so that the water may dilute the traces of the acid in the skin as much as possible. When acids burn causes injury, the water should be rendered alkaline by adding soda to counteract the acid.

Baillif

Seed Grain for Sale

I have for sale very choice Marquis Wheat for sale (originally purchased from Garden Seed Co., Winnipeg); also some dandy large Oats, and a small quantity of Barley. All clean.

CLAUS HOLEN, Chinook

HOGS!

The Farmers' Co-operative Co. are here to save you money that is continually going to the middleman, if those who have Hogs ready for the market will list them at the Elevator, they will receive notice when to haul in directly a car load is listed, this way you will receive all there is it. Satisfaction will be complete.

Co-operate in the Hog business and reap the benefit

If you have a car load we will either purchase outright or be glad to take them on consignment. Think this over and list with

W. LEADBETTER, Agent
